

Birds at Woodland Hide in Winter

The feeding station at the Risley Moss Woodland Hide attracts a lot of birds in winter. Over 30 species have been recorded and you can regularly see 15 species in half an hour (the 'record' is 20). Those below are those you are most likely to see. Why not print this page off and use it as a tick list when you visit.

Blue Tit

Great Tit

Robin

Chaffinch

Blackbird

Coal Tit

Bullfinch

Nuthatch

Magpie

Great Spotted Woodpecker

Jay

Duncock

Willow Tit

Wood Pigeon

Long tailed Tit

Tree Creeper

We hope you will enjoy your visit. Please remember to respect other users of the hide; you will all see more if you are quiet.
